

Milliken® Infrastructure Solutions

SplashBond™

Under Water Repair Epoxy

SplashBond epoxy is a unique, UV-resistant, underwater repair solution which displaces water and bonds permanently to wet surfaces. SplashBond epoxy was developed specifically as a corrosion barrier for use in splash zones under active cathodic protection. SplashBond epoxy can be applied above or below the waterline and is typically used in conjunction with an over-wrap to enhance performance.

Physical Properties

Vehicle Type	Epoxy/Aliphatic Amines
Pigmentation	Color/Inert/Fibrous Reinforcement
Colors	Standard White; Optional - Dark Gray
Finish	Slight Texture

General Properties

Mixing Ratio	1.0/1.0 V/V
Induction Time	Not Required
Pot Life	Approx 45 Minutes @ 77°F
Flash Point	Over 200°F
Solids By Volume	100%
Dry Time (Dust Free)	2 Hours @ 77°F
Dry Time (Service)	Immediately After Application
Storage Conditions	Ambient Temperatures
Voc	Essentially Zero
Thinner	Not Normally Required
Cleaner	Mek or Laquer Thinner

Typical Uses

- Underwater Piping Repair
- Splash Zone / Soil-to-Air Interface
- Cooling Tower Piping
- Offshore Platform

Benefits

- Effective up to 150 psi
- Temperature rated to 250 °F
- Installs rapidly – minimal down time
- Suitable for chemical service

Storage

1 year shelf life when stored @ 75 °F. Shelf Life may be extended when stored at lower temperatures, but above 40 °F.

Before using any Milliken Infrastructure Solutions, LLC product, the user must review the most recent version of the product's technical data sheet, material safety data sheet and other applicable documents, available at infrastructure.milliken.com or by calling 1-855-655-6750.
