

Milliken®Infrastructure

Vis™ Divide

Segmented HDPE Rigid Conduit

Vis™ Divide is *the* new solution in cable deployment—a segmented HDPE rigid conduit that provides dedicated pathways for the placement of more than one cable in a single conduit. Vis Divide's first-in-class innovation includes a fabric divider molded directly into the conduit that optimizes the network infrastructure space and provides operators deployment flexibility.

SEGMENTED CONDUIT

FEATURES & BENEFITS

- Increases cable capacity leading to less wasted space
- Protects cables ensuring no cable over cable damage
- Improves construction productivity
- Fewer conduits reduces handling, storage and transportation costs
- Provides more cabling options for the design professional, leading to reduced costs

INCREASE CONDUIT CAPACITY

APPLICATIONS

- Directional Drilling
- Trenching
- Plowed
- Direct Bury

TECHNICAL SPECS

- Meets ASTM F2160 and D3350 industry standards
- Available in Dimensional Ratio: DR11
- Nominal Sizes: 1½" and 2"
- Supplied with 1250 lb Vis™ Tape
- Standard HDPE conduit reel configurations
- Available configurations:
 - 1½" 2-cell
 - 2" 2-cell
 - 2" 3-cell
